

## **Sullair Extends Partnership with Brabazon Pump, Compressor & Vacuum to Service Customers Across the Midwest**

### **Brabazon Opens Facility in Saint Louis Area and Announces Plans for New Decatur, Illinois Facility for Spring 2015**

**Chicago, IL – August 26, 2014** – Sullair, an industry leader on the forefront of innovative compressed air solutions since 1965, has announced that it is expanding its relationship with distributor Brabazon Pump, Compressor & Vacuum to service customers across the Midwest. As part of this expansion, Brabazon recently opened a new 15,000 square-foot facility in Saint Peters, Missouri, and the company plans to open an additional facility in Decatur, Illinois for the spring of 2015.

Brabazon is the Midwest's largest independent distributor of pumps, air compressors and vacuum equipment. In addition to selling Sullair air compressors, Brabazon provides design, engineering, installation and maintenance services that maximize reliability and uptime, while minimizing customers' operating costs.

Brabazon's new facility will house a wide inventory of Sullair air-compressors and OEM parts. Staffed by sales and service technicians, the new office will provide assembly and testing services, 24x7 customer support, and auditing services conducted by DOE-certified Compressed Air Systems AirMasters+ qualified specialists.

"Brabazon and Sullair have worked together since 1985, and during these 29 years, we've expanded our relationship into new territories on three different occasions," states Brabazon's CEO Heath Brabazon. "We continue to work with Sullair because they're genuinely interested in minimizing our customer's operating costs, and that's not always the case with other air compressor manufacturers. Sullair's broad portfolio enables us to customize solutions that meet the exact needs of our customers, and the reliability of Sullair's technology is second-to-none."

"Brabazon's team not only possesses the service and maintenance expertise needed to keep our mutual customers happy, but they also bring to the table an aggressive and successful approach to finding new business," said Brent Mumford, Sullair VP and General Manager, Stationary Compressors and Aftermarket. "Brabazon is a perfect example for the type of partner we seek to work with, and we're looking forward to expanding our efforts together in the Saint Louis area and throughout Southern Illinois."

Members of the Brabazon team will be helping present Sullair solutions in booth # N-6969 at the International Manufacturing Technology Show (IMTS), on September 10th and 11th at Chicago's McCormick Place. Media members interested in meeting with Sullair and Brabazon can arrange a briefing by contacting Sullair's David Andrews at [David.Andrews@sullair.com](mailto:David.Andrews@sullair.com)
